Comanche Nation College

Medical Coding Training Program - Customized Training for Tribal Health Care Employees

Intermediate ICD9 & CPT – November 8-11, 2010

GOAL: The goal of Comanche Nation College Medical Coding program:

- To properly identify the Coding skill level of each candidate based on Beginning, Intermediate and Advanced level coders
- To assist with properly training the Advanced Coder to become a candidate for the AHIMA Certified Coding Specialist
- Identify and train potential future candidates for a career in Coding and Billing

PURPOSE: The purpose of this initiative from the Centers for Medicare & Medicaid Services (CMS) is to ensure that Tribal Colleges and Universities (TCU) are providing the opportunity for tribal healthcare clinic employees and community members to expedite the process of funding via medical coding. While Indian Health Services providers are also in need of training this effort will focus on tribal providers for two reasons: (1) Indian Health Service is a program for its providers and (2) the number of tribal providers is increasing as a result of Indian Self Governance.

Basic ICD9 & CPT Coding Workshop - This course provides an overview of the very basic coding rules for the CPT, ICD-9-CM and Level II (HCPCS) coding systems and how to apply the fundamental rules to code patient services.

Intermediate ICD9 & CPT Coding Workshop—This course provides an overview of the intermediate level coding rules for the CPT, ICD-9CM and Level II (HCPCS) coding systems and how to apply the fundamental rules to code patient services.

- **Administrative Fee: \$30.00** **Class Days: Monday-Thursday**
